RESEARCH DATA MANAGEMENT

13.03.2023 - 17.03.2023

About the Training Programme

The systematic way of collection, organization, storage, preservation, and sharing of data of a research project is called research data management. As per the scholarly review studies, it has been identified that resourcing, alignment of research and data management, researcher openness, and governance of research data are the important issues in research data management. Non systematic way of research data management leads to incomplete, incorrect, and corrupted data. The process of normalizing inconsistent entries, tracing out missing information consumes a long time. An initial commitment to properly collecting, recording, and storing data saves considerable time span. Hence it is targeted to conduct a training programme on the topic "Research Data Management".

The main goal of the training programme is to provide interactive, brainstorming and awareness sessions to the research aspirants in the topic of "Research Data Management". It aims to conceptualize prominent issues involved in managing the research data. It will explain the importance and scope of data management in the research arena by emphasizing the processes in finding, organizing, describing, storing, sharing data with different rights and permissions.

There is no registration fee. The participants will be selected based on the first come first serve basis.

About VIT

VIT was established with the aim of providing quality higher education on par with international standards. It persistently seeks and adopts innovative methods to improve the quality of higher education on a consistent basis. The campus has a cosmopolitan atmosphere with students from all corners of the globe. Experienced and learned teachers are strongly encouraged to nurture the students. The global standards set at VIT in the field of teaching and research spur us on in our relentless pursuit of excellence. In fact, it has become a way of life for us. Our Memoranda of Understanding with various international universities are our major strength.

Resource persons

Experts from reputed Universities and Industries.

Target Audience

Research scholars and aspirants from Universities, AICTE approved Engineering Colleges, Arts and Science colleges.

Registration

Last Date for registration: 03.03.2023

Intimation of selection (through mail): 08.03.2023

E-Certificate will be provided for successful participations in all technical sessions and assessment sessions.

There is no registration fee. The participants will be selected based on the first come first serve basis.
